EXPERIENCE

HealthNet, Team Project — *Head Developer*

January 2017 - May 2017

Developed and managed a web-based healthcare program using Python and Django for a hypothetical hospital network. Designed the project structure using uml diagrams and design patterns. Lead the team in meeting deadlines while maintaining product quality for releases.

RIT, Rochester, New York — *Supplemental Lab Instructor*

August 2016 - PRESENT

Worked alongside professors teaching introductory computer science courses where students learn Python, Java, and get a look at in-depth algorithms and logic. Graded and debugged students labs and projects as well as mentored students in the computer science tutor center.

One Life Maps, Bartlett, Illinois — *Front End Web Developer*

May 2017 - August 2017

Produced customer facing web pages in WordPress using HTML and CSS to create intuitive and accessible content. Converted files to different formats to save server space and enable a wider range of browser compatibility. Developed leadpages for a wide reaching marketing strategy.

Westminster Christian School, Elgin, Illinois — *Summer Facility Manager*

Summer 2015, 2016, 2017

Undertook multiple facets of facility maintenance throughout the campus. Led team of 4 and worked closely with school staff in order to assure tasks were getting done in a timely and effective manner.
